DIINI OMAR
Full-Stack Python Developer

EDUCATION

Ihub
Full-Stack Python, Django,
2021 - 2022

Hyderabad, India

Middlesex Uni
BSc Product Design
2012 - 2015

London, UK

SKILLS

- **Python, Django**
- **Sql, Sqlite, Postgresql**
- **JS, CSS, Html,**
- **Product Design**
- **Solidwork**
- **Illustrator**
- **Photoshop**
- **Teamwork**
- **Problem solving**
- **Communication, Clarity**
- **Active listening**

INTERESTS

PERSONAL STATEMENT

I am a dedicated Python developer with a proactive approach to code ownership, constantly seeking ways to enhance productivity and minimize errors. My expertise spans both **back-end** (**Python, Django, Rest Framework**) and **front-end** (**JavaScript, Bootstrap, CSS, HTML**) technologies.

Passionate about bringing ideas to life through code, I am committed to staying current and contributing to collective company objectives. I am seeking a dynamic role where I can leverage my diverse skill set in a collaborative environment, eager to embrace new challenges and drive success.

EMPLOYMENT

Full-Stack Developer

Hazmis ltd   Jun 2023 - Mar 2024

- Actively participated in regular progress meetings, addressing obstacles and prioritising tasks for efficient project execution.
- **Developed a Django model** with fields, executed database migrations, & implemented user registration & login views using Django's authentication.
- **Enhanced code reusability by 12%**, resulting in a 23% boost in overall productivity, ensuring timely project delivery.

Python Developer

Tradeingiant   Apr 2022 - Mar 2023

- I task was developing Django database management and template design to ensure the smooth integration of the system, our specific requirements for the custom employee system, resulting in a more simplified workflow.
- With proficiency in Python, RestAPI, and Django, I bring an analytical mindset to problem-solving.
- My dedication to achieving our company goals, coupled with proactive teamwork and efficient project management, resulted in a one-third reduction in development time.

Product Designer & Manufacture

Lesflux ltd   Jan 2016 - Feb 2022

- Spearheaded the development of cutting-edge products, seamlessly integrating wireless charging technology into everyday wearable items.
- Managed relationships with factories, overseeing the testing of product samples to ensure quality and adherence to specifications.
- Analysed customer needs, conceptualised innovative products, and obtained customer approval for design concepts.

SKILLS
Soft Skills

I'm quite good at **solving problems** when it comes to coding, which enables me to take on challenging tasks and come up with effective, original solutions. For instance, in a recent project, I overcame a particularly challenging flaw by carefully analyzing the problem and coming up with a workable solution that improved system performance overall. My ability to communicate well has enabled me to make sure that **my team works** together in a clear and efficient manner. When I'm giving a presentation at a meeting or **receiving comments on my code from a colleague,** I want to communicate clearly and in an encouraging manner. I can better understand various requirements and points of view when **I actively listen**. I believe that by genuinely listening to my team members, all viewpoints are taken into account, leading to more comprehensive and **effective solutions.**

HOBBIES AND INTEREST

In my free time, I have a strong desire to travel and **discover new places,** which helps me to become more **culturally aware a**nd to extend my perspective on the world. I have a great love for music and think that playing different instruments is a rewarding method to **express my creativity.**
I also read a lot and am constantly excited to start **reading new books** that broaden my perspective. In order to keep ahead in the **rapidly changing digital world,** I also have a strong interest in always improving my skill set, especially in the area of technology. I like to learn **new coding languages** and applications.
